User-Centric Approach

Focused on the
needs of the user

Friendly and Helpful

:-)

- 15 Years of Experience
-  Clickability Trained
- Fast and Efficient
- Clean Code

"I really enjoy the challenge of developing media websites, especially ones that focus on news. I like to focus on the little details that improve the users experience.

"My goal is to help people (both within the organization and the users of the site) by finding out exactly what they need and delivering the best experience possible.

"I do so in a friendly way and with a sense of humor."
